BUSINESS NAME

SENJA DESTINATION

INDUSTRY

TRAVEL & TOURISM

CLIENT'S REQUIREMENT:

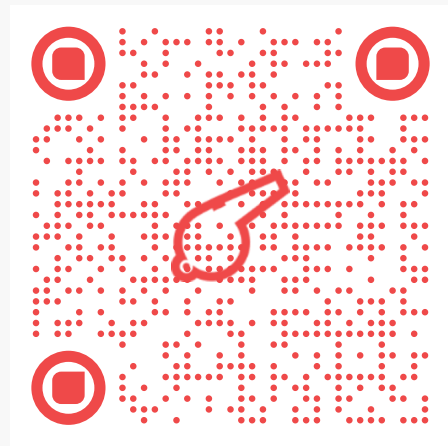

The client approached us for a booking website for their apartment rental booking business.

PROCESS FOLLOWED

- ▶ We follow a common process for all our clients.
- ▶ As this client had unique requirements, we brainstormed within the team and tailor-made the process that best suited the client's goals.

WHAT DID WE DO FOR THE CLIENT?

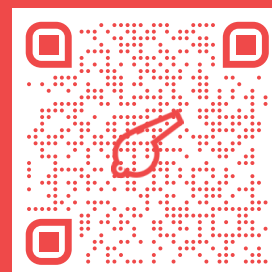

- ▶ Destination Senja offers vacation rental rooms in Senja, Norway.
- ▶ The client uses Smoobu booking system to manage their rooms' bookings.
- ▶ As Smoobu API has restrictions, we built the room booking system entirely within WordPress using Custom Post Type, Smoobu Booking Widgets, and Smoobu Availability Calendar widgets and integrated the booking feature into the website.

Alright, sounds like a plan!

Let's go!!
